

# OTT Platform

redstrim

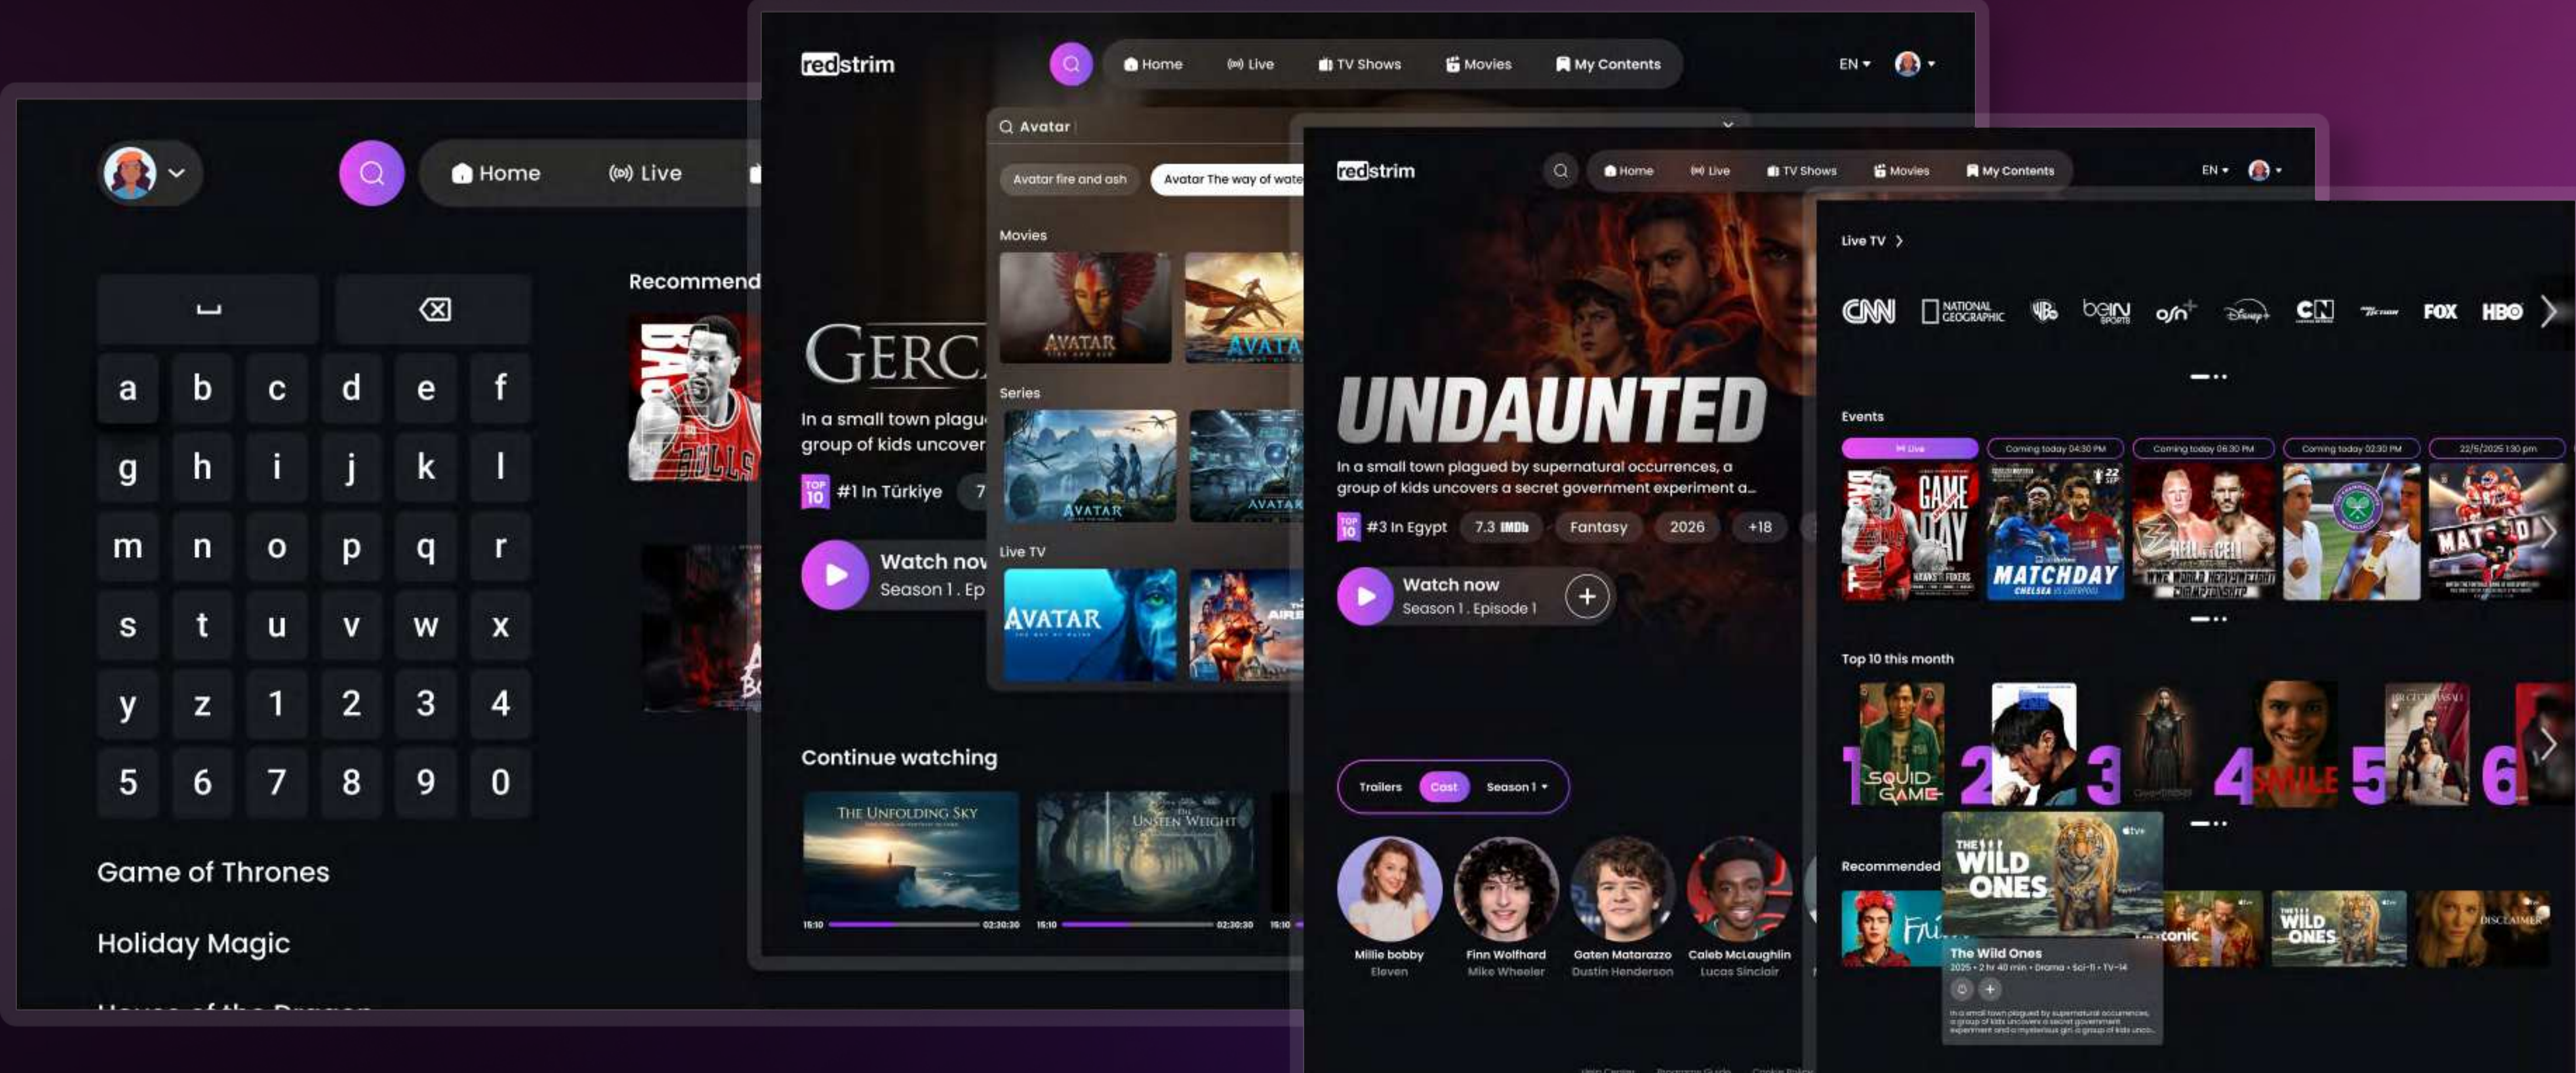

# Launch Your Branded OTT & IPTV Platform Everywhere

Expand your audience effortlessly with our fully adaptable solution. We deliver a seamless and highly optimized viewing experience across all major Smart TVs, mobile devices, and web browsers, ensuring your content is accessible anywhere, on any screen.

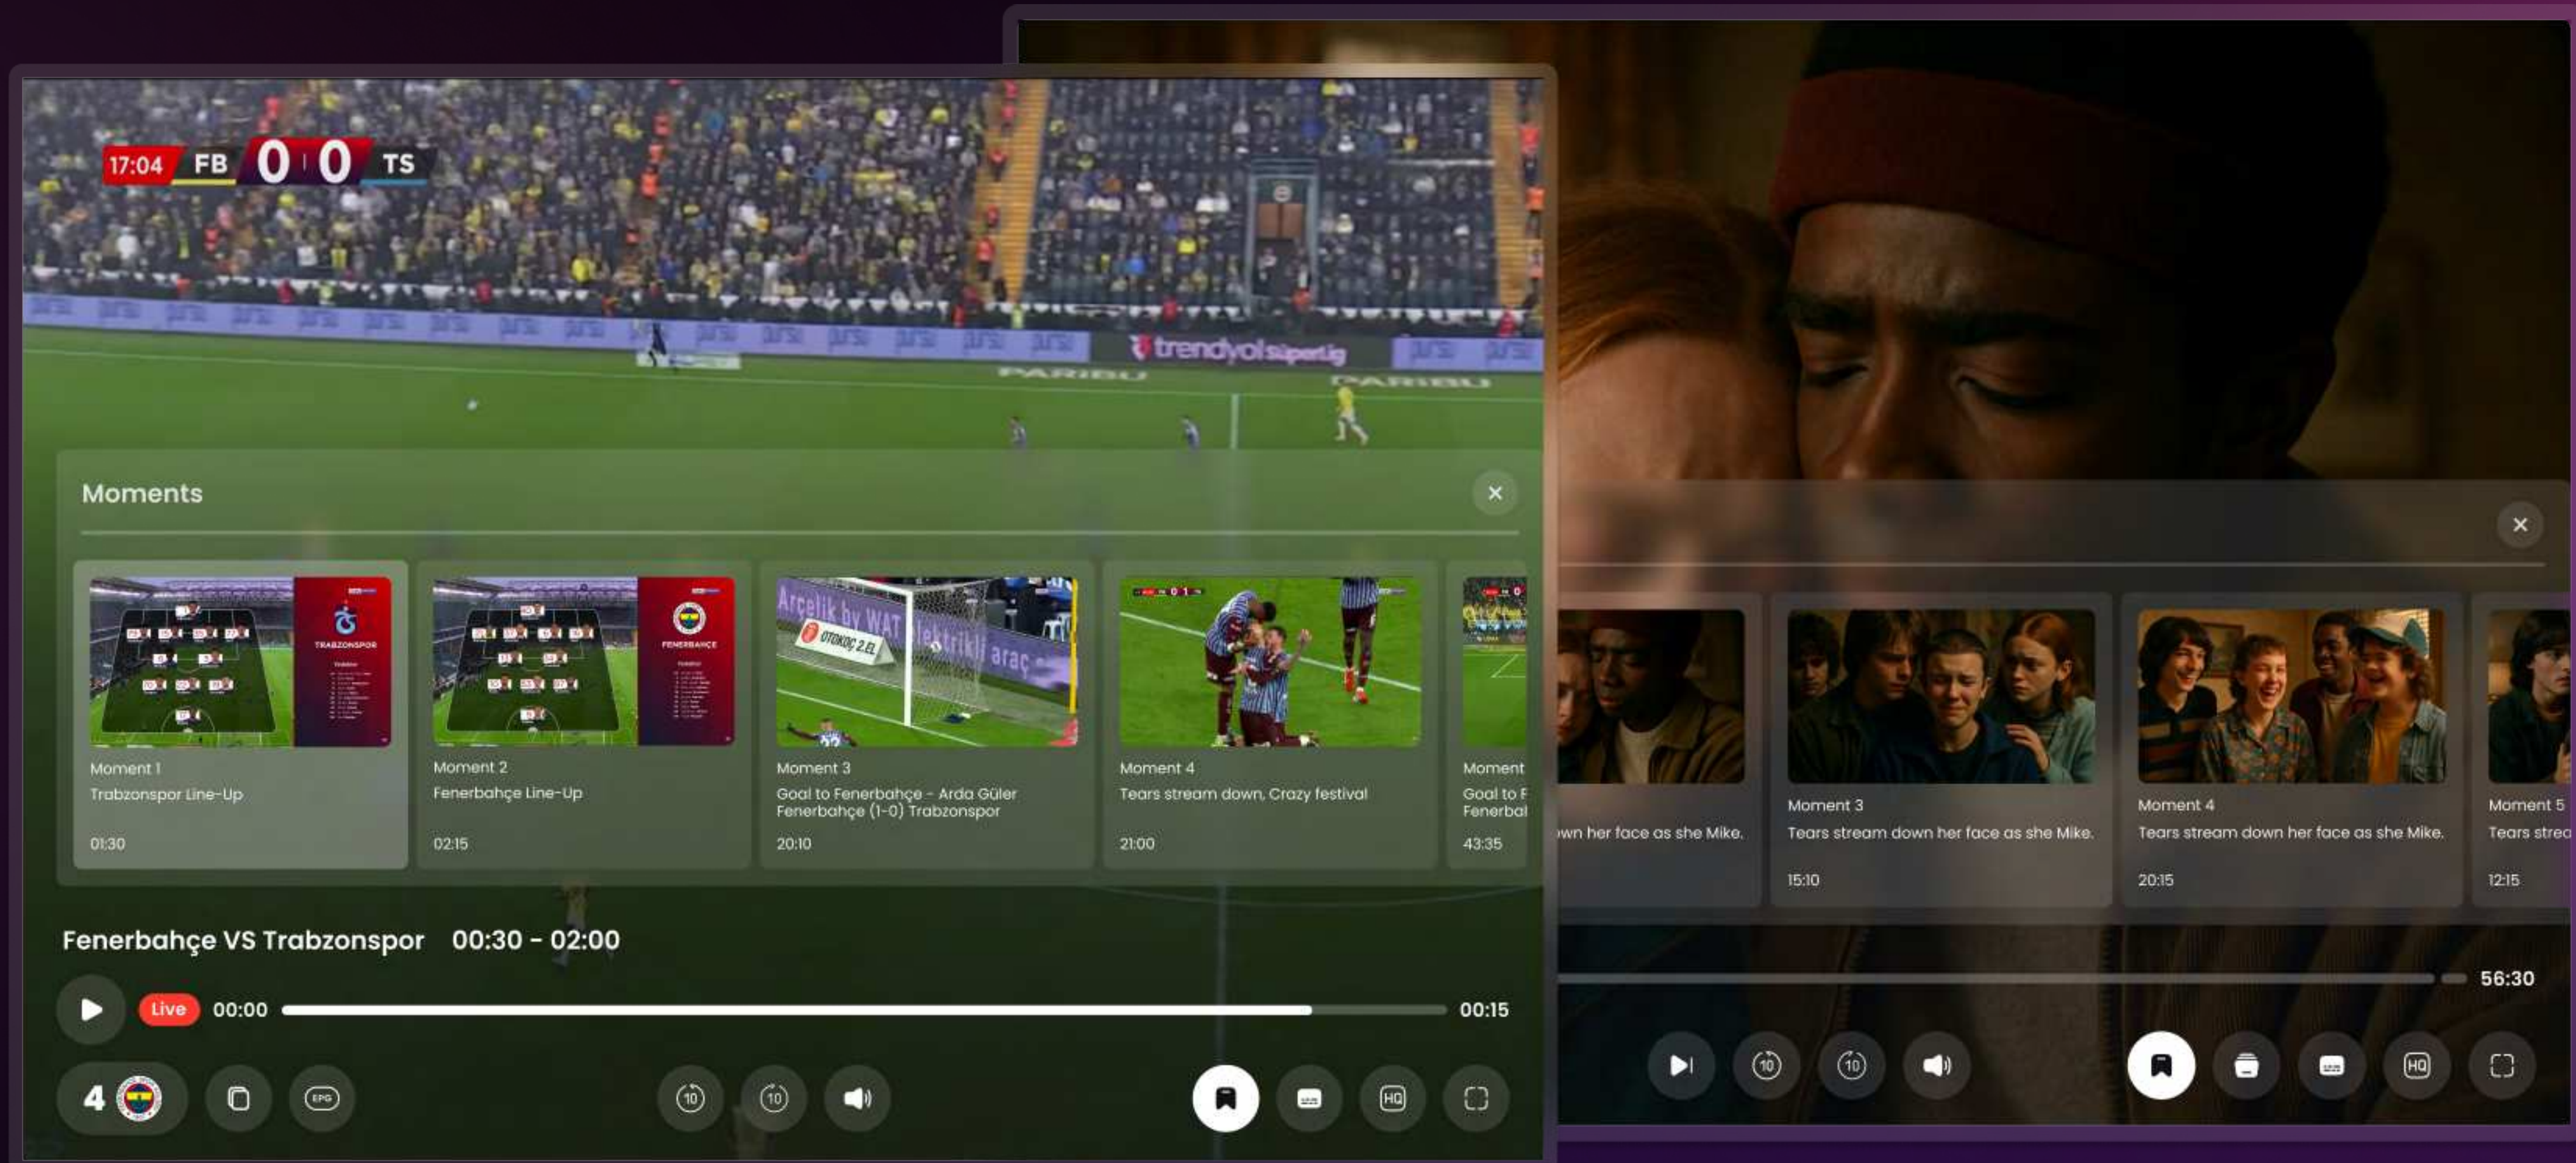

# Smart Browsing & Search

Experience intuitive browsing and advanced search to easily find content by title, genre, or actor. Users can access detailed metadata, manage favorites and watch history, and enjoy highly personalized recommendations tailored to their unique viewing habits.

# Interactive Moments

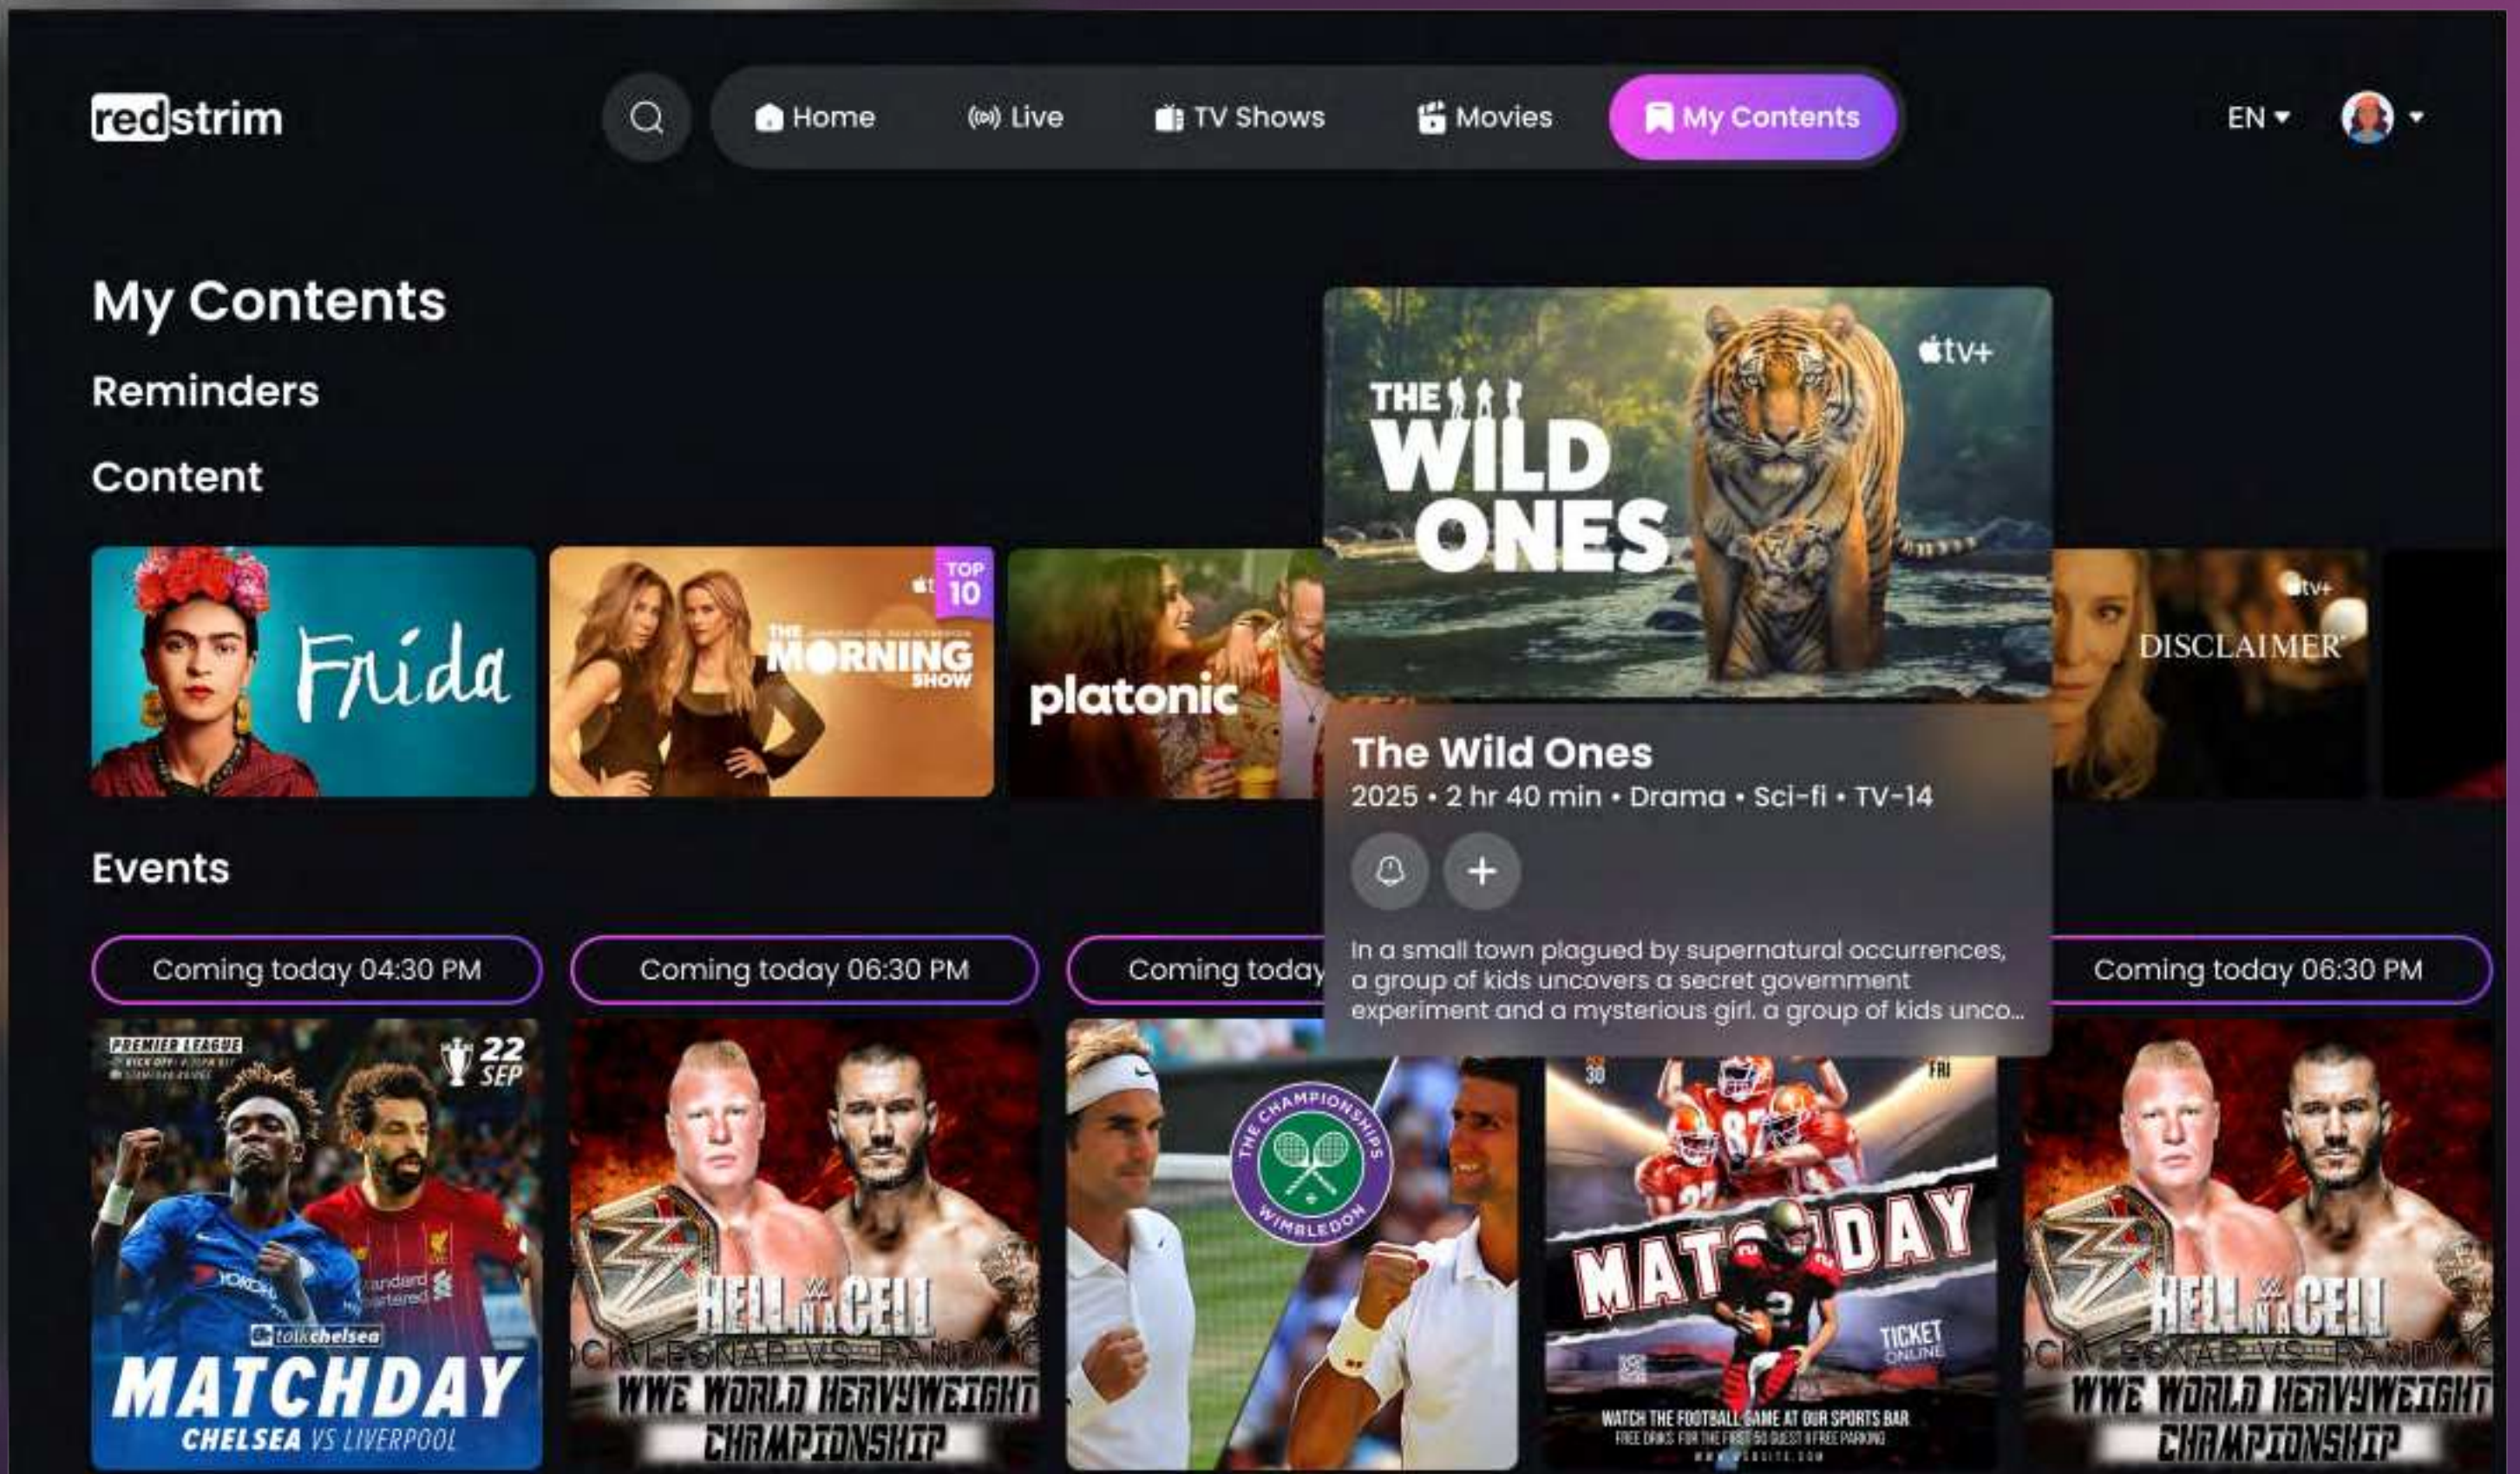

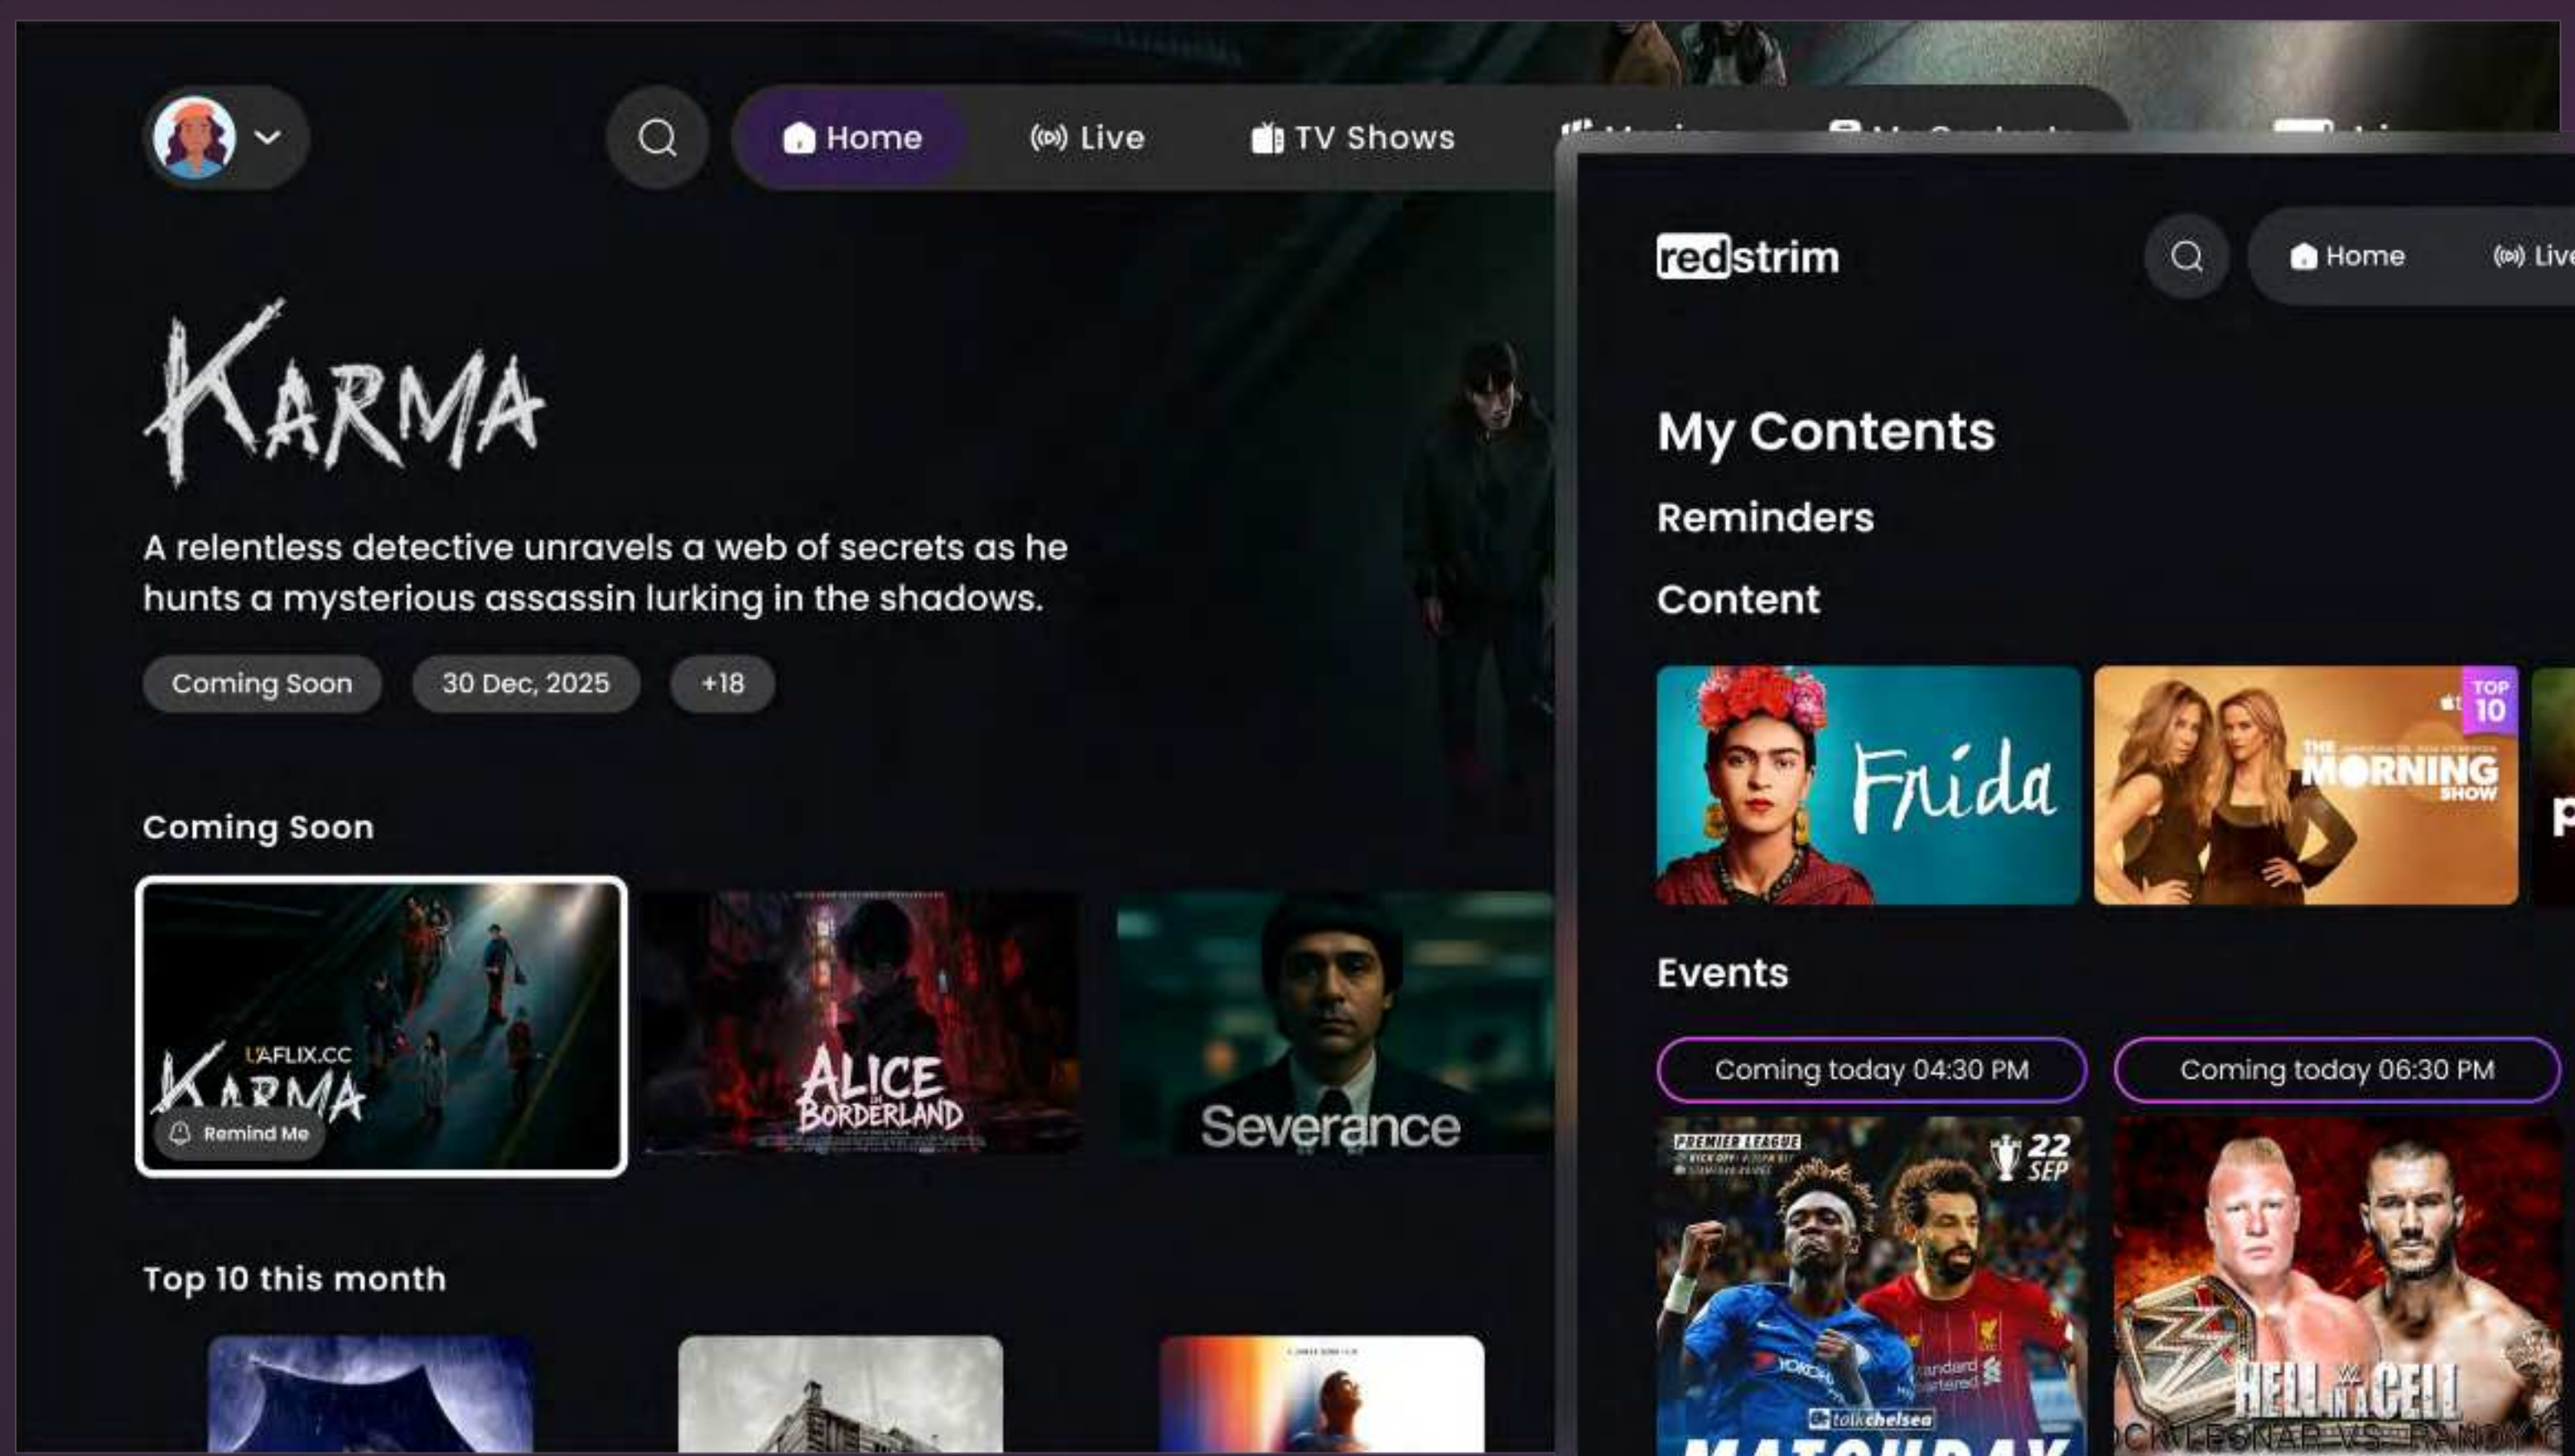

Enhance viewer engagement with our interactive “Moments” feature, seamlessly integrated into both VOD and Live TV players. Users can easily browse and jump directly to key highlights or crucial events right from the playback timeline, ensuring they never miss the best parts of the broadcast.

# Smart Reminders System

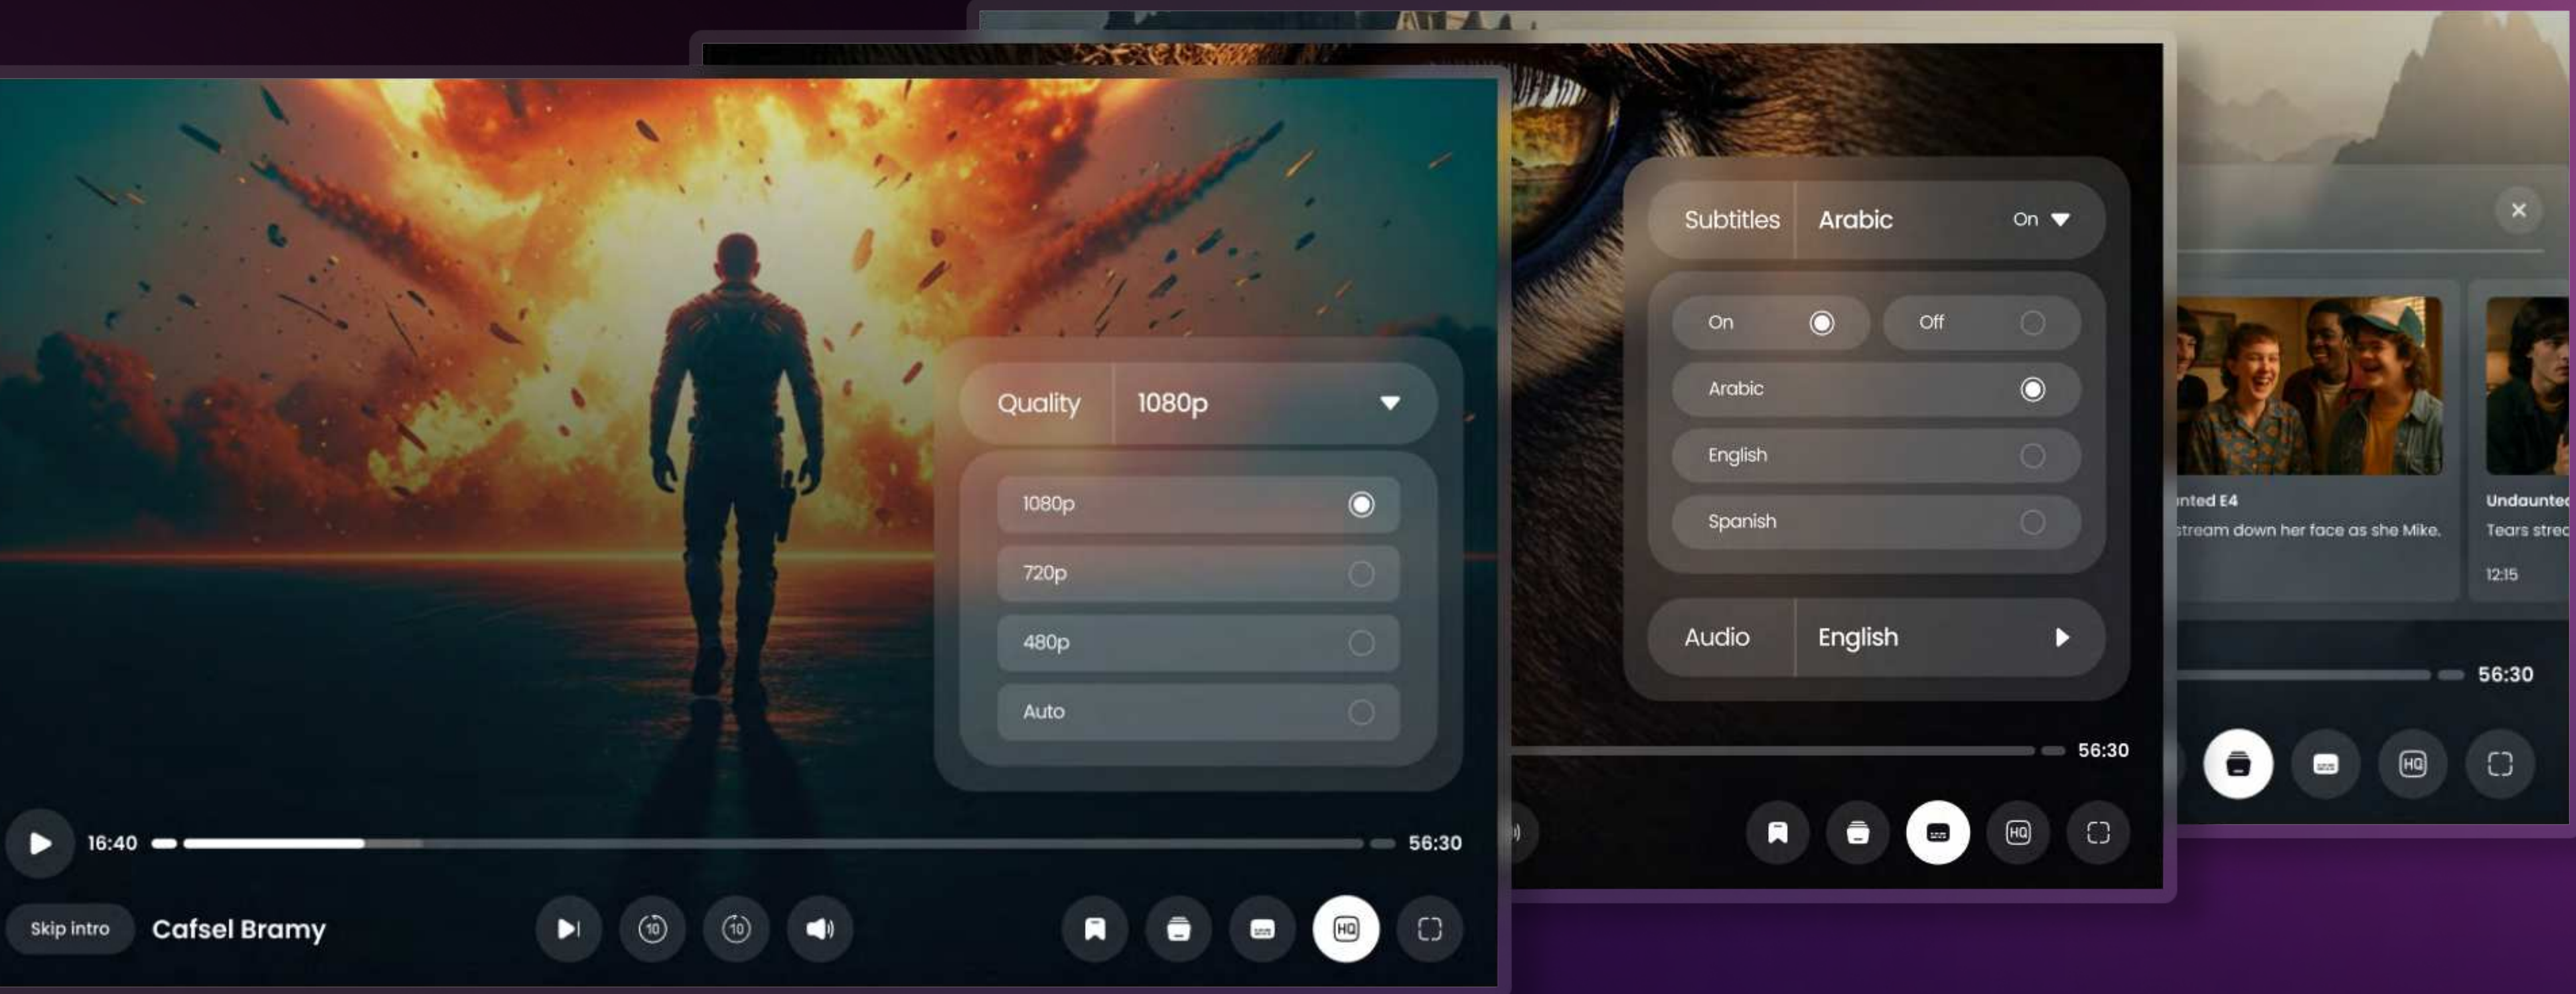

A dedicated feature allowing users to set alerts for upcoming movies, shows, and live events. It seamlessly organizes anticipated VOD content and live broadcasts in one accessible hub, ensuring users never miss a release.

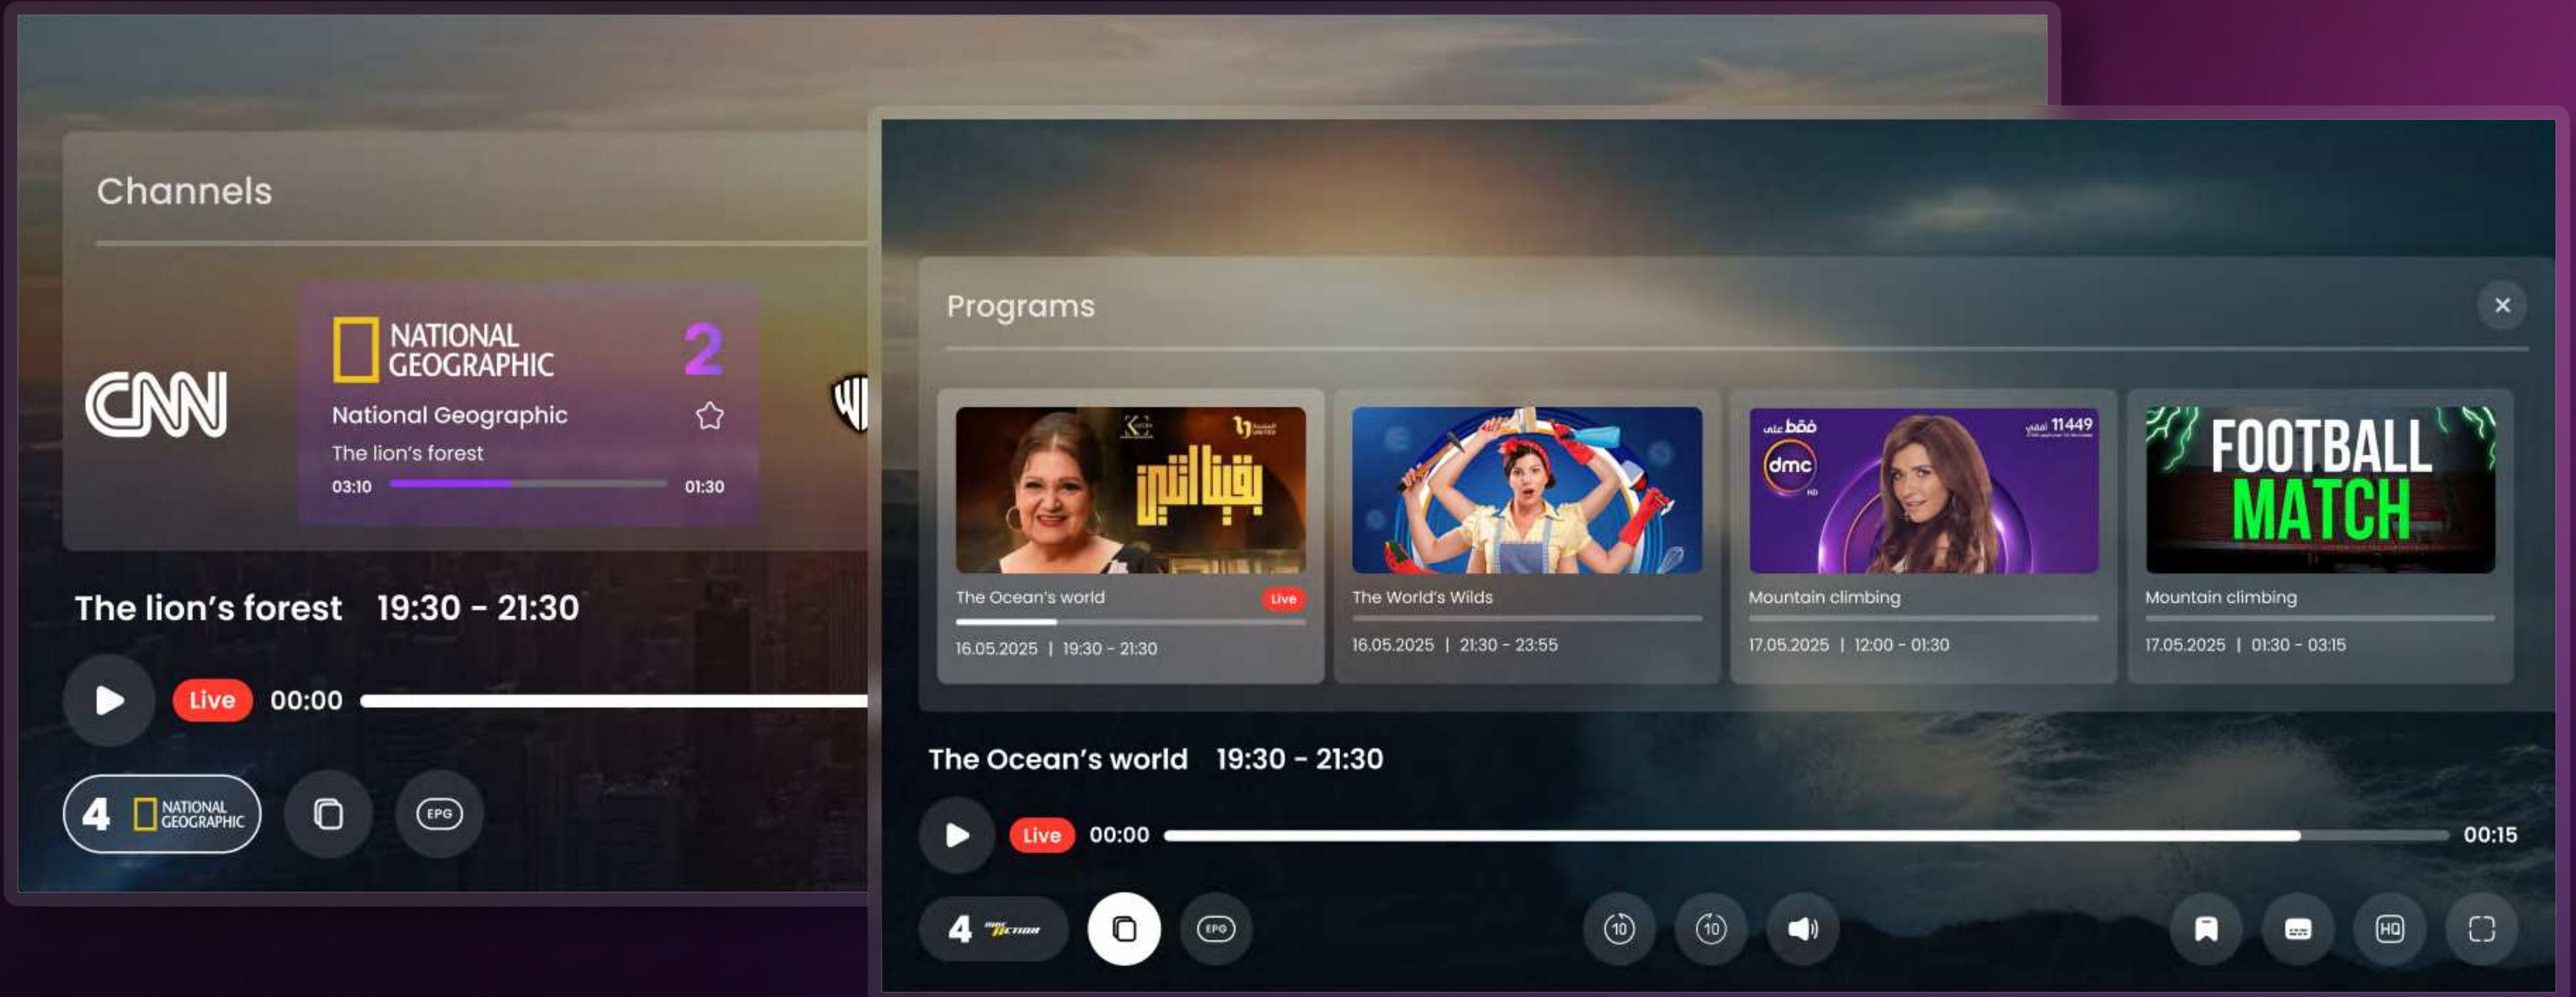

# Seamless Player Experience

Find exactly what you want without the hassle. We designed our player to put full, effortless control of your media right at your fingertips.

# Effortless Navigation

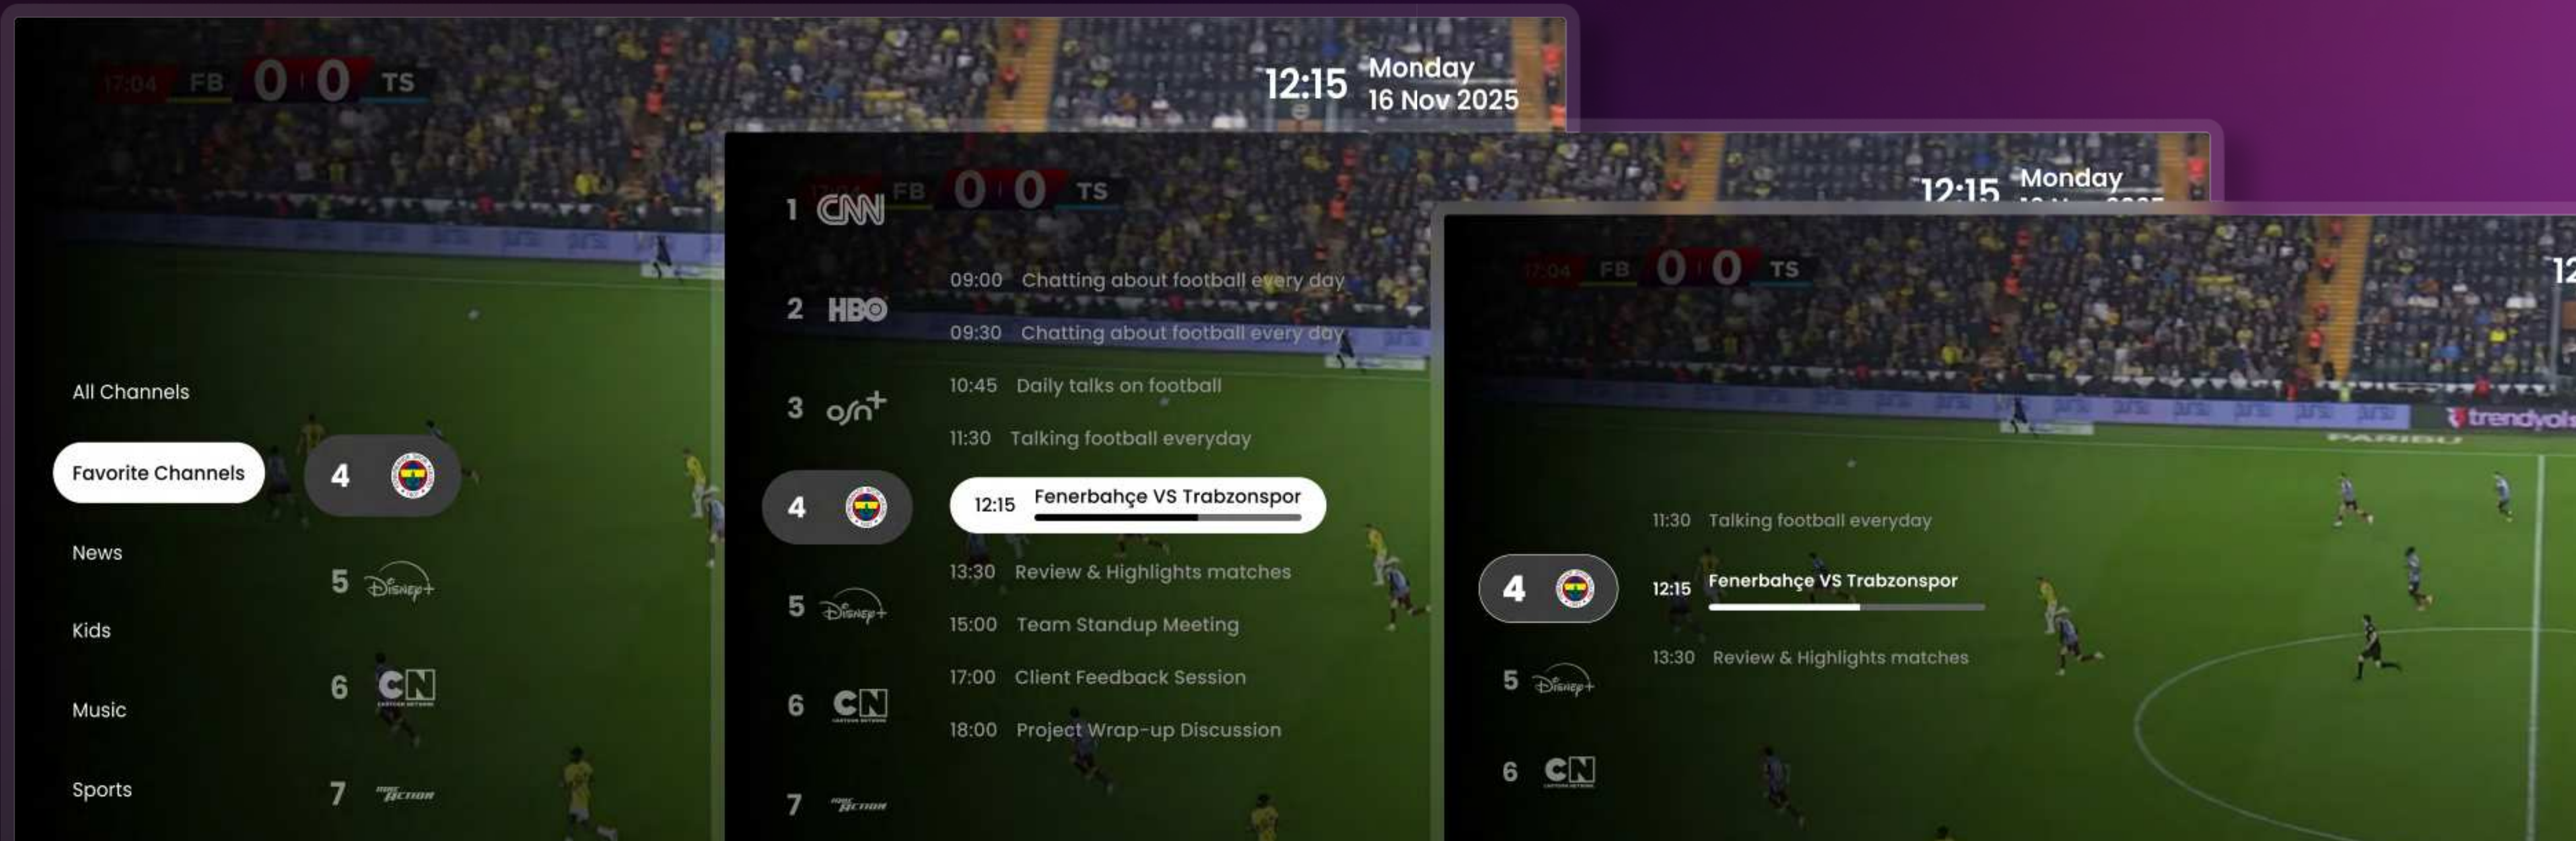

Experience total control without leaving your screen. Effortlessly toggle between a live Channel List for quick flipping and a detailed Programs List to see what's coming next. Our integrated player ensures your discovery process is as smooth as your streaming.

# Effortless Navigation

With our intuitive interface, you never have to choose between watching the content and finding what's next. We've designed a Quick Navigate system that lets you toggle seamlessly without leaving the live action:

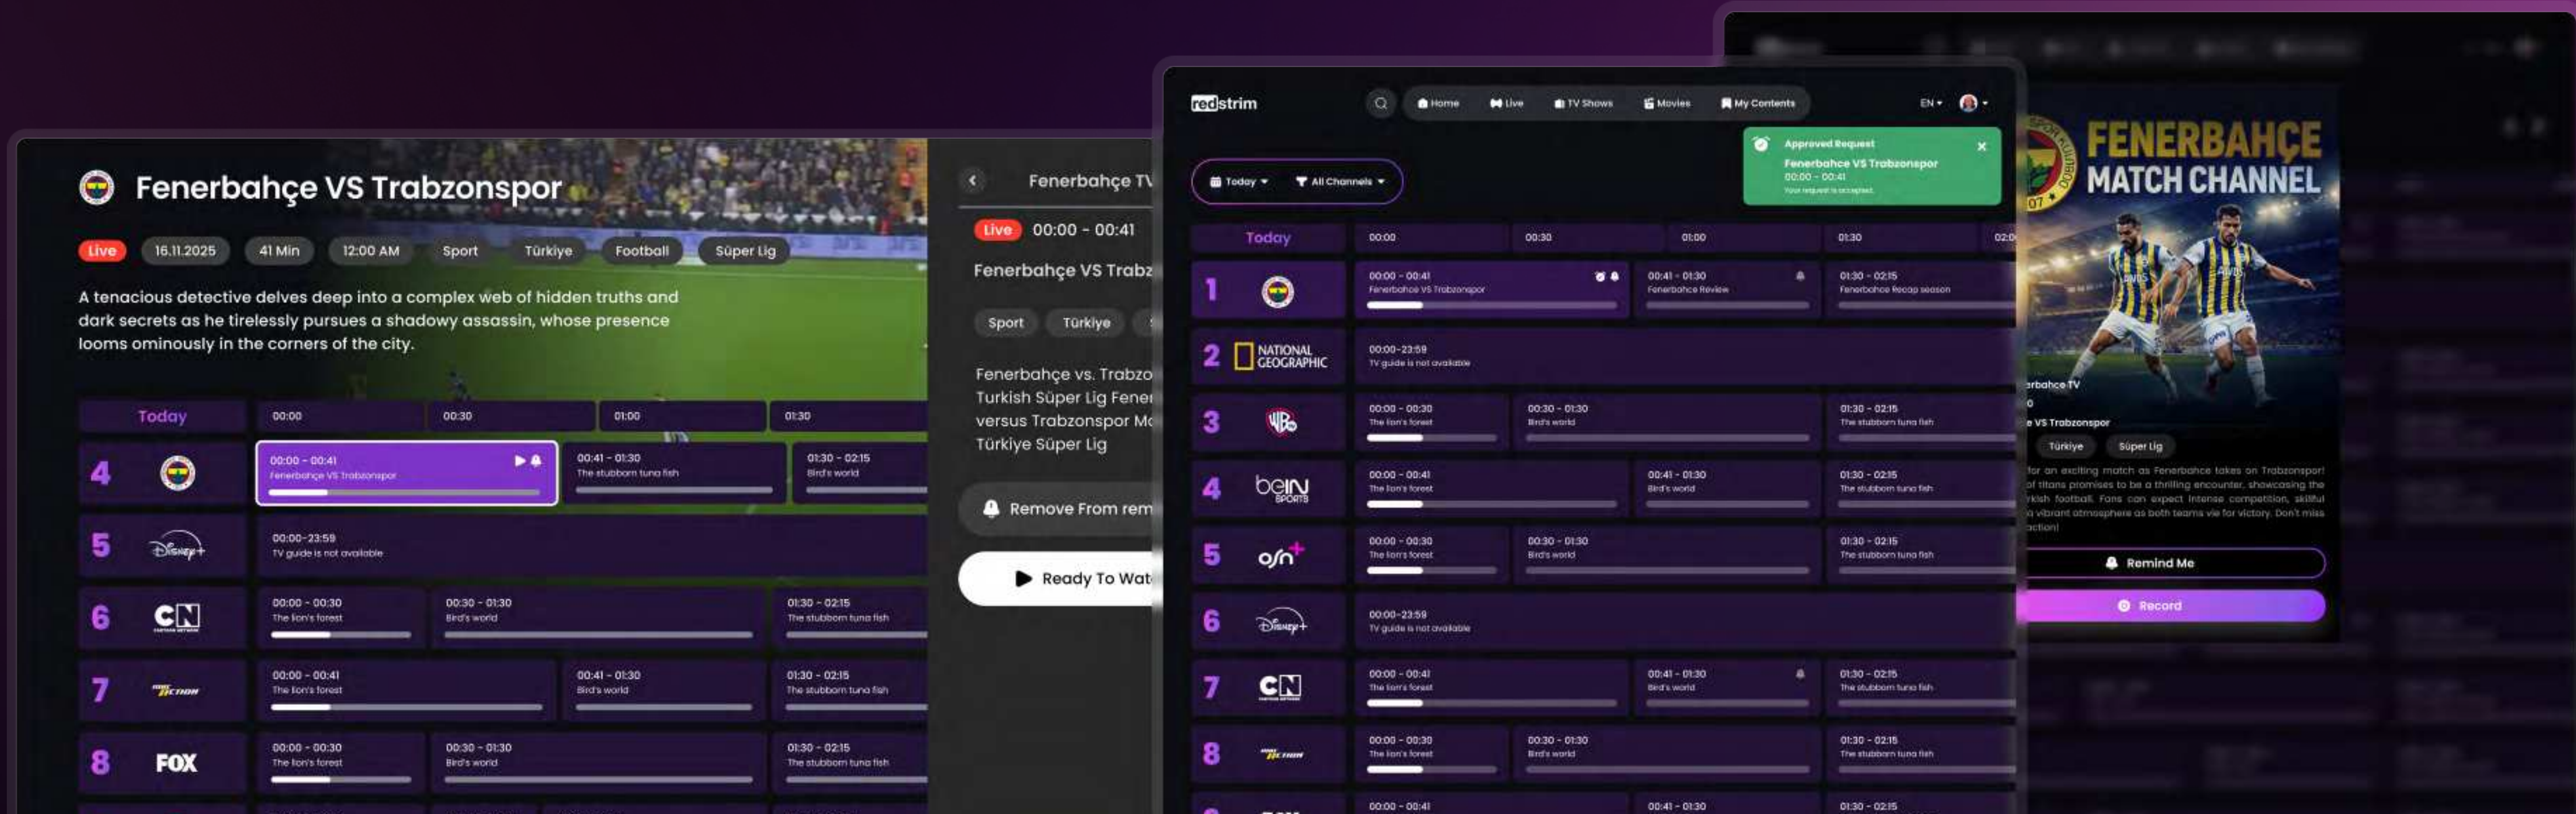

- **Live Channel List** : Flip through the full lineup for a broader look at what's airing.
- **Favorite Channels** : Jump straight to your top-tier picks with a single click.
- **Program Guide** : Dive into specific channel schedules to see exactly what's coming up next.

# Catchup

Life happens, but your favorite content shouldn't have to wait. We've built a seamless recording workflow that keeps you informed every step of the way:

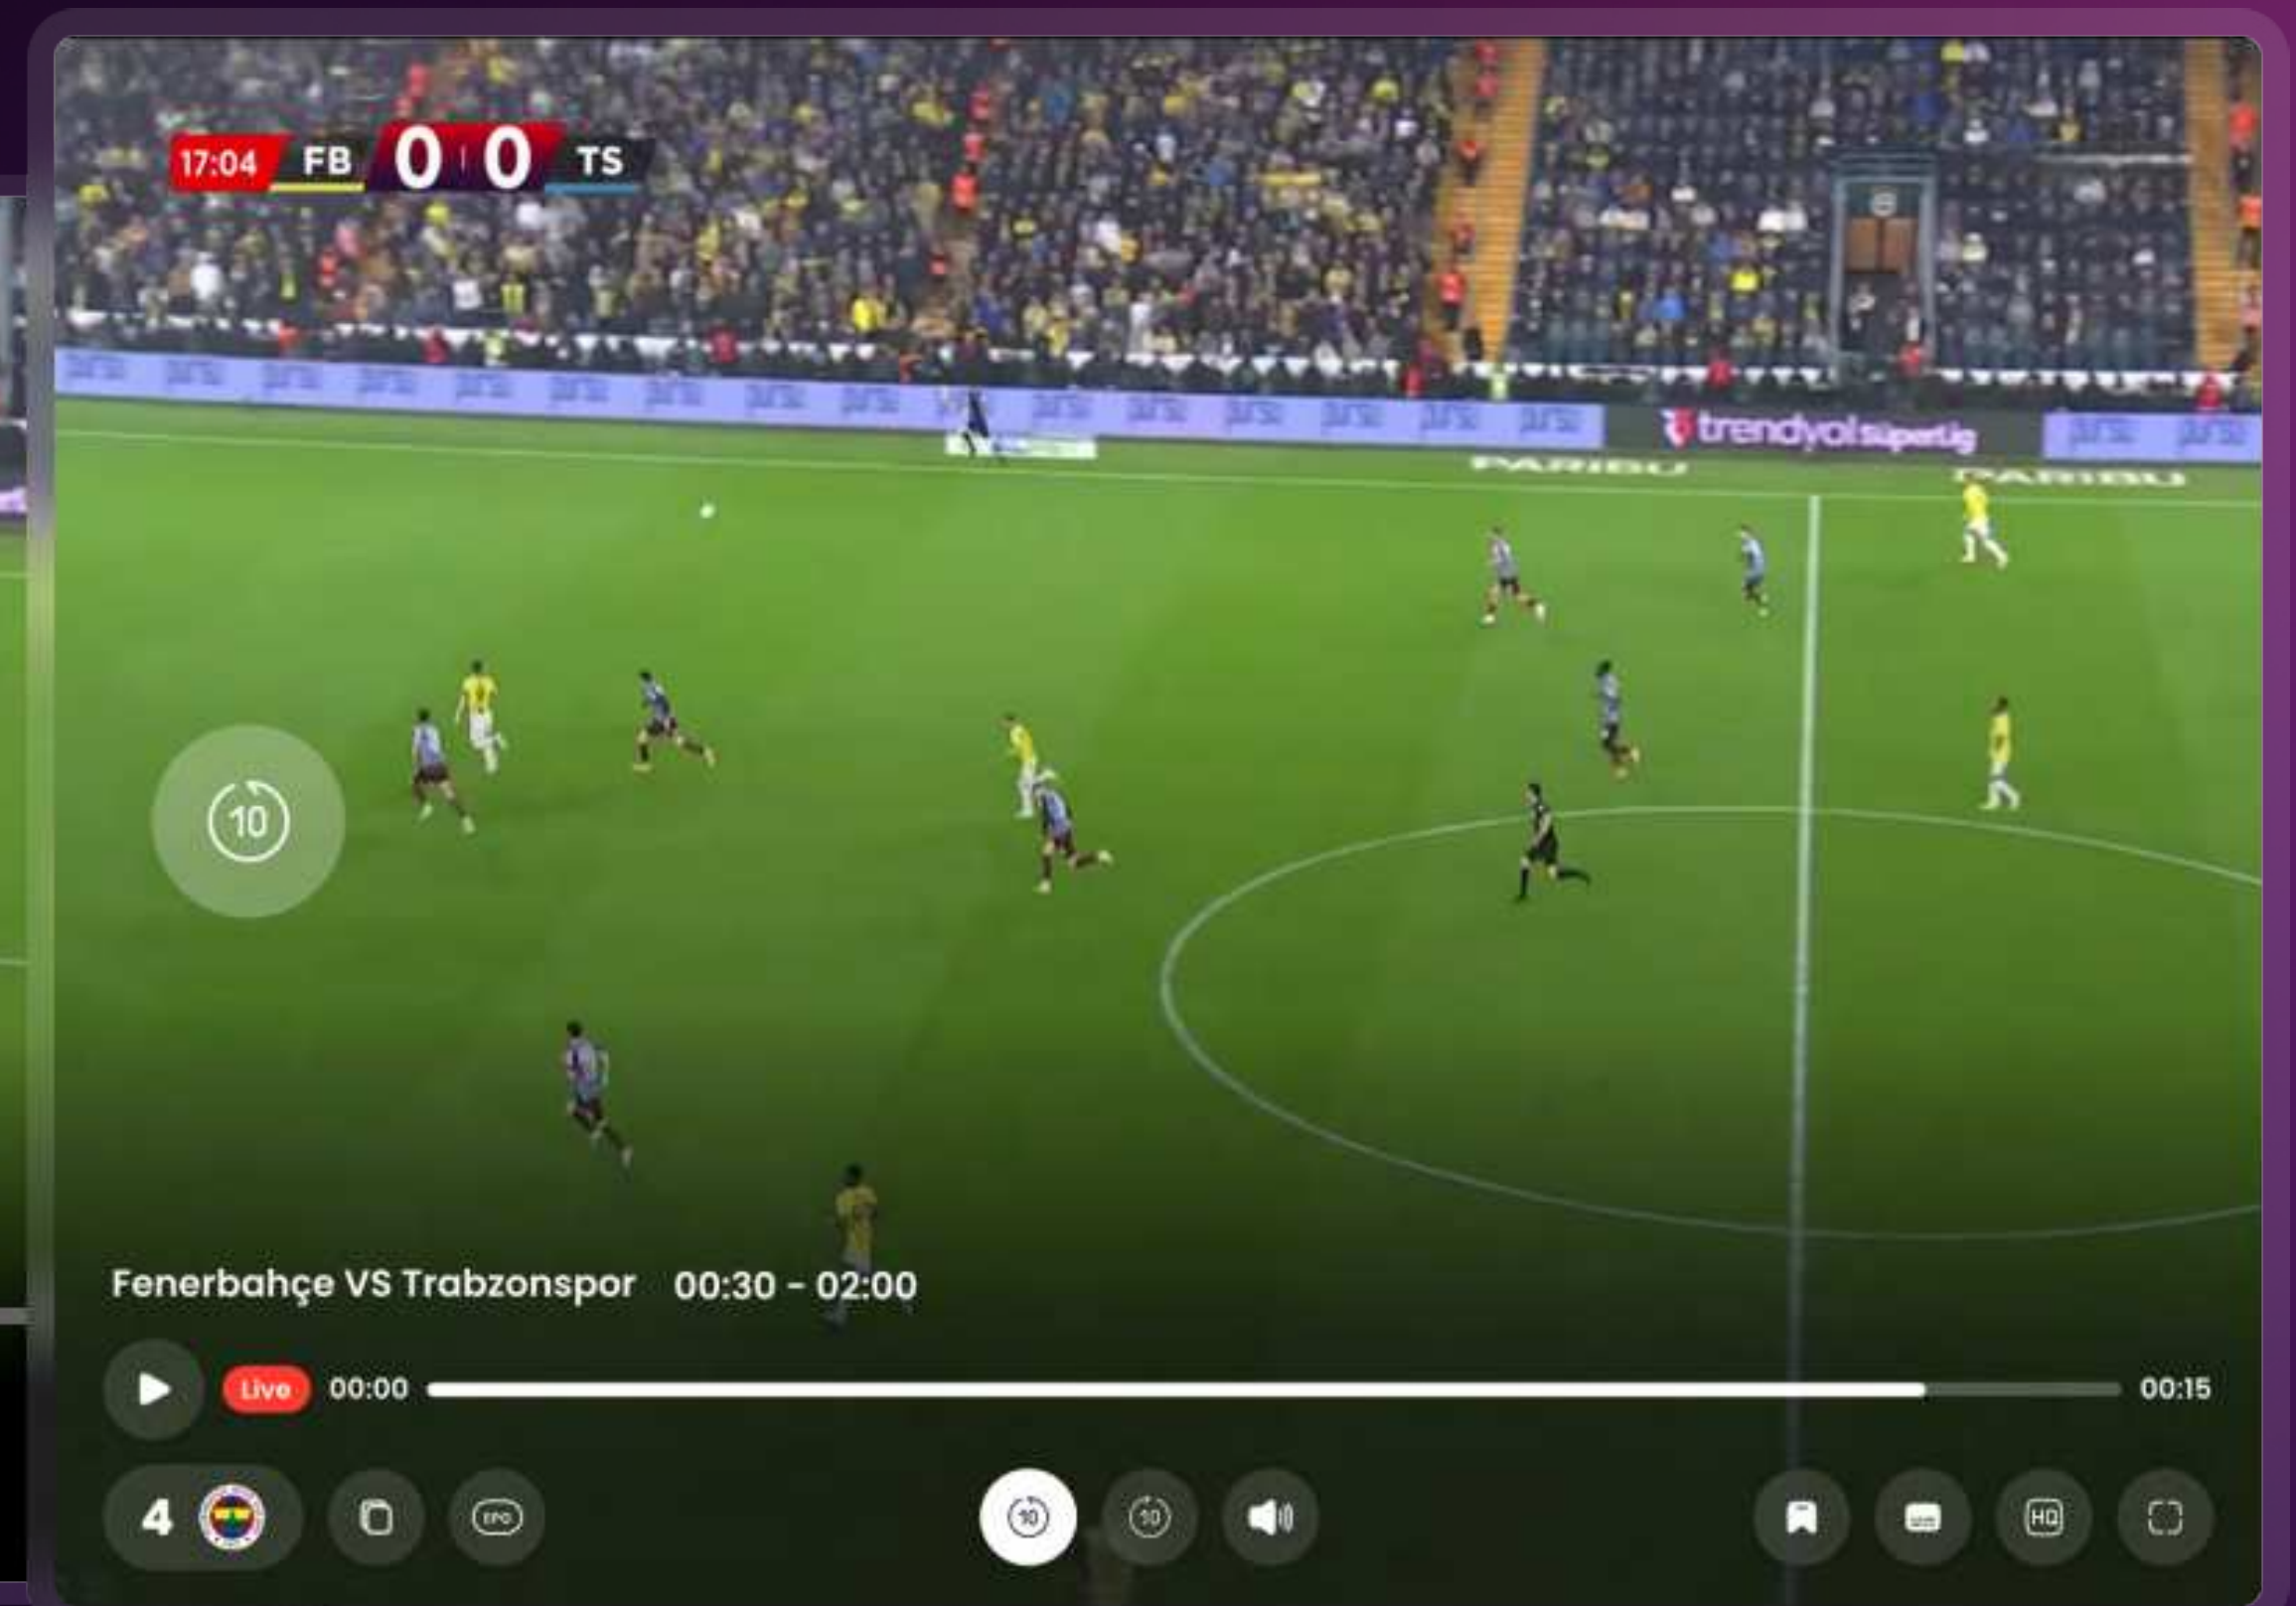

- **One-Click Record** : Instantly schedule any program with a single tap.
- **Under Review** : Our system automatically validates the stream and prepares the storage for your recording.
- **Live Recording** : Track the progress in real-time as your content is saved securely to the cloud.
- **Ready to Watch** : Once the broadcast ends, your recording is instantly processed and waiting in your library.

# Time Shift

Never let a late start or a missed play get in your way. With our Time Shift technology, you have the power to control live TV as it happens:

- **Play From Beginning** : Arrived late to the match? Instantly jump back to the opening whistle and catch every second of the action from the start.
- **Instant Rewind** : Missed a goal or a key line of dialogue? Seamlessly scrub back to any minute of the live broadcast to see it again.

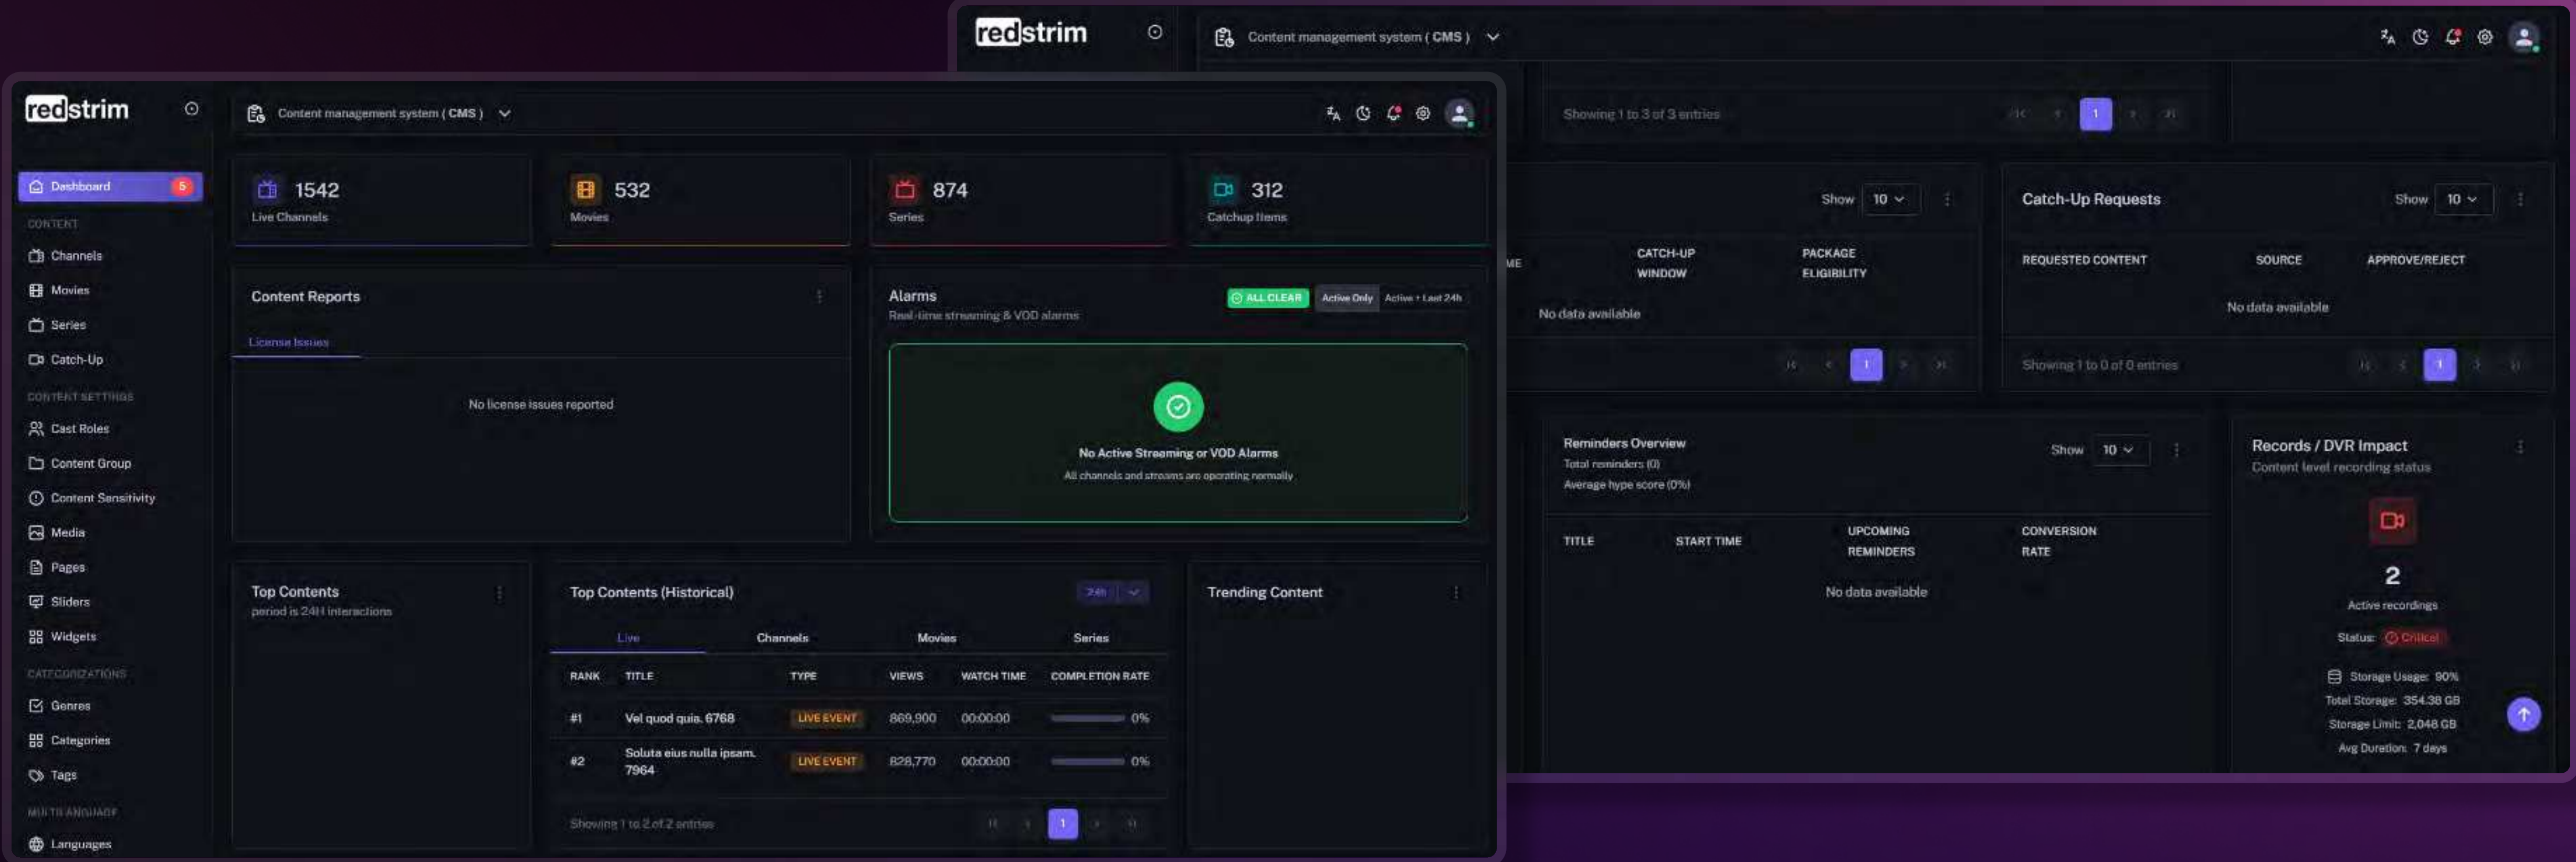

# OTT Dashboard

# Content Analyitcs

Get a complete, real-time view of your platform’s performance and user activity. Monitor content trends, track what users love most, and measure engagement with powerful insights into views, watch time, and completion rates. Stay ahead with smart analytics that highlight trending content, growing interest, and audience behavior—all in one place. Keep operations running smoothly by tracking reports, licensing issues, and system usage with clear priority indicators. With flexible filters, customizable time ranges, and easy-to-use controls

# Content Management System

Our platform provides dedicated management for every type of media, allowing you to organize Live Channels with full EPG integration, oversee extensive Movie and Series catalogs with complete metadata support, and offer Catch-Up TV services to ensure your users never miss their favorite moments

# Content Settings

This section empowers administrators to manage professional details like Cast Roles and Content Groups, while maintaining safety through Content Sensitivity labels and age-based ratings. It also provides high-level control over Media assets, Sliders, and interactive Widgets to customize the visual flow and engagement of the application interface.

# Categorizations

Boost user engagement by structuring your content with a hierarchical system of Genres, Categories, and Subcategories that make navigation intuitive. By utilizing precise Tags and Keywords, you can enhance search optimization and ensure that the right content reaches the right audience through tailored collections and smart discovery tools.

# Content Configuration

This section allows for the deep technical setup of the platform, including the implementation of Digital Rights Management (DRM) policies to protect premium content. It provides granular control over Device Types and Client Applications to ensure compatibility across all platforms, while managing Licenses and Streaming Options—such as bitrate and resolution—to optimize the viewing experience for every user.

- CONFIGURATION
  - DRM Settings
  - Device Types
  - License
  - Client Applications
  - Streaming Options

The image displays three overlapping screenshots of the Content Management System (CMS) configuration interface. The top screenshot shows the 'Device Types' management page, which includes a table with columns for Name, Status, Max Quality, Default Protocol, Supported Protocols, Created At, and Actions. A single entry for 'Smart TVs' is visible. The middle screenshot shows the 'Providers' management page with a table containing Name, Contact Email, and Created At. One provider, 'Public Content', is listed. The bottom screenshot shows the 'DRM' management page with a table for Title, Created At, Updated At, and Actions. Three entries are shown: 'PlayReady', 'FairPlay', and 'Widevine'. Each screenshot also features a 'Show 10' dropdown and an 'Add' button for its respective section.

# Audits

The Audit system gives you full visibility into every action and system change, ensuring transparency, security, and complete control over your platform.

# Server Management

A centralized dashboard to monitor server health, bandwidth usage, and automated failover.

The screenshot displays a 'Server Management' dashboard within a 'Content management system (CMS)'. The dashboard features a table with columns for SERVER NAME, TYPE, DOMAIN, STATUS, CONNECTIONS, PRIORITY, POOLED, SSH CONNECTION, CREATED, UPDATED, and ACTIONS. There are 6 server entries listed, each with a status indicator (e.g., LIVE STREAMING EDGE, VOD STREAMING EDGE, DVR, LIVE STREAMING ORIGIN) and a 'Copy SSH' button. A sidebar on the left shows 'Infrastructure' with 'Server Management' selected. The bottom of the table shows 'Showing 1 to 6 of 6 entries' and a pagination control.
